Key Issues for the Joint Annual Review (JAR) of NWSSIP Input Paper on NWSSIP Action Plans Progress 2005

The National Water Sector Strategy and Investment Program (NWSSIP) has been developed during 2003 and early 2004. It was the first time that such comprehensive view was taken on the stakes and problems in the sector. More than 120 professionals from line ministries, specialized authorities, research institutions, NGOs and other civil society representatives as well as donors engaged in intensive discussions, being organized in several thematic working groups, during almost one year. NWSSIP was adopted by donors in early 2005 and finally approved by cabinet in May 2005. It was recognized that NWSSIP constitutes a sound, comprehensive and inclusive strategy dealing with all water sector aspects, including agriculture, economic incentives and fiscal policies as well as civil service reform. Support and recognition has since encouraged the Ministry of Water and Environment to move ahead implementing some very difficult policies and controversial actions.

NWSSIP is a long-term dynamic policy paper, which will have to be constantly updated and refined. One of the outstanding particularities of NWSSIP is its down-to-earth focus which is demonstrated through the respective investment program for the 2005-2009 period, and a set of action plans which cover the full range of issues to be tackled specifically in the short and medium term.

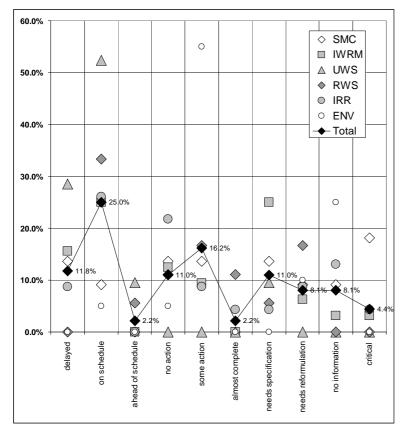

Action Plans have been grouped into (i) sector management and coordination (SMC), (ii) water resources management (IWRM), (iii) urban water supply and sanitation (UWS), (iv) rural water supply and sanitation (RWS), (v) irrigation and watershed management (IRR), and (vi) human and environmental aspects (ENV). A total of 46 strategic issues and 125 individual actions have been defined in this framework. These actions, of course, refer to different time horizons, relate to overarching cross-cutting issues and are partly interdependent.

In late 2005 and early 2006 the MWE, supported by the donor core group, has collected information to update the status and progress of the different actions by means of self-assessment. For that, the following terminologies have been applied:

Adherence to scheduled time	Degree of attention	Degree of clarity
Delayed – a set start of action or	No action – postponed for good	Needs specification - no
projected progress has not been	reason, or unattended for lack of	measurable outputs / outcomes
met	capacity or low priority	defined as yet
On schedule – ongoing and within assigned time period with adequate progress	Some action – activities going on, not clearly related to agreed schedules	Needs reformulation – defined action not in accordance with updated strategic objectives or plans
Ahead of schedule – progress beyond anticipation	Nearing completion – little work left to complete, does not relate to adherence to schedule (maybe late, but is almost done)	No information – due to lack of inputs, no data on status available

In addition, any action could be marked as critical irrespective of its progress or status. So far, MWE was able to gather status updates for all 125 actions (100%), which is an indicator for good communication and responsiveness of the actors (ministries, authorities, donors) in the sector.

At about one year since its formal adoption by GoY, the progress made on the action plans looks satisfactory which is shown in the following graph:

While 11.8% of actions are delayed, we find 27.20% on or ahead of schedule. The remainder has not been rated as to compliance with time schedules.

On the attention side, 11.0% show no action, 16.2% some action and 2.2% are almost completed.

On the clarity aspects, there is substantial need for further specification (11.0%), reformulation (8.1%) or no information is available (8.1%).

Altogether, only 4.4% cases have been rated "critical" thus needing priority follow-up.

There is a specifically notable progress on the UWS action

plans with above 50% on and 10% ahead of schedule, but also there are almost 30% delayed. IWRM shows a complex scenario with a notable 25% of actions needing reformulation, for which a number of proposals are on the table.

At present, works have started to priority-target the critical issues and to reformulate those needing additional clarity. Additional information is being collected to fill the remaining gaps and then transfer the action plans into the NWSSIP Monitoring & Evaluation System presently starting operation. Within the planned first Joint Annual Sector Review, the suitability of the different actions and terminologies will be finally assessed.

NWSSIP Action Plans - Update of Status as per December 2005

Group	Issues and strategies	of Status of actions as per review											
		defined	delayed	on schedule	ahead	no action	some action	almost compl.		needs reform.	no info	critical	Total status
