Water and Education

Human Resources Development

Prof. Dr. A.S. Babaqi

Outline

- Current situation of the water sector
- Needs for development in water sector
- Tools needed
- Role of WEC

Current Situation

- Development Ministry of Water and Environment
- Development Water Law
- Implementation is a challenge

Current Situation

- Water resources development is common activity
- Water resources **MANAGEMENT** is less common

Current Situation (example)

- Water supply of Taiz
 - New wells are developed
 - Current losses of distribution system are high

Needs for development

- In addition to the specific water related technical skills, more water management knowledge and skills are needed
- Need to create a national and regional intellectual IWRM resource base that has the capacity and capability to identify, formulate and undertake programmes and projects of national and international organizations.

Needs for development

- There is also a need for an intermediate between private sector clients (contract research) and the knowledge institutes in Yemen and abroad

Tools Needed

- IWRM education
 - taking into account that implementation of water related policy needs enforcement

Tools Needed

- Programmes offered in Water and Environment Science in the Arabic Region are primarily focused on the technical and scientific aspects of the water sector...

Tools Needed

- ... It is now clear that the water crisis is not purely a technical problem, but is a multi-faceted socio-economic problem that requires a multidisciplinary approach

Role of WEC

- Centre for IWRM education
- Centre of “New water-thinking”
- Point of contact with international organizations (IWMI, GWP, CAP-Net)
- Support from Wageningen University, Technical University Delft, Cairo University amongst others

Role of WEC

- To provide MSc curriculum and professional diploma courses on IWRM
- Listen to water and educational sector to provide a fitting curriculum
